

4 Clubs 1 Vision 1 Mission in Abruzzo Italy

41 Clubs Italy also concentrates efforts on Abruzzo Region in Italy.

Our help project for the Abruzzo region in Italy which has been hard hit by a violent earthquake will be concentrated on the small town of Onna.

This is the town that suffered the most and where many young people lost their lives and those remaining have nothing. It is our wish to donate them a centre where they can meet once again for cultural events, music, theatre and cinema.

The proposed wooden prefabricated multi-centre building which is naturally anti seismic will be integrated in the town's reconstruction plan.

We will be choosing only the best materials possible and on realization it will also be self sufficient as regards forms of needed energy; we will now give you some important details regarding the realization of this project.

We hope to provide a building of about 150m², immediately ready for use to achieve this we

need an estimated €100,000 euro. We have and are receiving all kinds of rough estimates and will choose only the best with regards to price, quality, construction time and other general conditions.

The people on the spot who will be responsible for the realization of the project are:

Mr Celso Cioni, ex Tabler in Aquila, chairman of the local Chamber of Commerce,

Mr Giustino Parisse editor in chief of the local newspaper "Il Centro d'Abruzzo", both these gentlemen live in Onna, together with another ex Tabler Mr Gianni Chiodi, Chairman of the bruzzo region.

The general coordination will be in the hands of Mr Diego Giacoboni who, will by then be our, Past President. The ground on which the social centre will be built belongs to the Town Hall, once the project has been completed, the building will also belong to the town of Aquila.

In accordance with a local convention obtained, this building is to be the "Associazione Culturale Onna" for the use of the remaining young people in Onna.

The building will be named "Casa Club 41 International". The people responsible for the supervision and planning of works will be Arch. Valerio Borzacchini and Ing. Paolo Nespeca respectively from the 41club of Ascoli Piceno (their services are completely free of charge) together with a technician sent by the town council.

Once the town council has authorized the project the building will be erected within 90 days.

The building of the Social Centre will be constantly followed by our supervisors and our men on the spot.

As regards the financial aspect of the matter, our Club 41 National Treasurer together with our National Auditors, next years National councillor and the President of club 41 Teramo (club in formation) will also be closely following expenditure.

All incoming or outgoing sums of money will be disclosed every week by our National Treasurer. The Club 41 International Treasurer will be constantly informed of all financial transactions. A webcam will be installed so all may visibly follow the building of the Social Centre day by day until its completion.

It must be quite clear to all that whoever helps or takes part in the realization of this project, they will do it without any form of compensation.

We are about to make an enormous effort, together, we can do it.

Yours in continued friendship
Diego Giacoboni
Club 41 Italy
President
