

In the journey through life that we all make, we travel within a sphere of action and reaction – these are the practical, emotional and flowing aspects of our lives.

When we reach the "mature" age of 45 (and up), we start challenging different aspects of our being by enriching our daily lives.

We allow ourselves to examine our level of openness and readiness with regard to the things that are happening in and around us.

Some of us choose to channel these energies through service, friendship and tolerance.

These people, like you and us, are the better ones!

We are proud to invite you all to share with us these special moments of enlightenment and celebration
